Professional Summary

Computer Science Engineering undergraduate (B.Tech 2027) at CMRIT Hyderabad with hands-on internship experience in full-stack web development, database design, and AI/ML workflows. Proficient in JavaScript, Python, Java, and SQL with practical exposure to cloud platforms, workflow automation, and agile development. Holds multiple industry-recognized certifications across AI, cloud, networking, and ServiceNow domains. Eager to contribute as a fresher with clean coding practices, strong problem-solving skills, and a results-driven mindset.

Technical Skills

Languages: JavaScript, Java, Python, Java, C

Web Technologies: HTML5, CSS3, React.js, Responsive Web Design, REST APIs, Client-Side Validation

Databases: MySQL, MongoDB, SQL, Relational Database Design, CRUD Operations

Cloud & AI: AWS, Google Cloud Platform, Vertex AI, Agentic AI, RAG Pipelines, NLP, Machine Learning

Tools & Platforms: Git, GitHub, VS Code, ServiceNow (ITSM), Cisco Packet Tracer

Software Practices: Object-Oriented Programming (OOP), Software Testing, Debugging, Version Control, Agile, Technical Documentation

Work Experience

IBM SkillsBuild (AICTE Supported 1M1B)

Dec 2025 – Jan 2026

AI for Sustainability Virtual Intern

Remote

- Designed and deployed Agentic AI and RAG-based pipelines to solve real-world data challenges, producing optimized and verifiable automation logic.
- Applied Natural Language Processing (NLP) techniques and iterative code refinement to improve system accuracy and simulate structured troubleshooting workflows.
- Generated comprehensive technical documentation and system designs ensuring full auditability and traceability of engineering decisions.

Apex Planet Software Pvt Ltd

Jul 2025 – Aug 2025

Web Development Virtual Intern

Remote

- Designed and developed 5+ responsive, client-facing web components using HTML5, CSS3, and JavaScript, adhering to enterprise specifications and architectural guidelines.
- Integrated front-end logic with backend interfaces and executed rigorous cross-browser compatibility and performance verification tests.
- Debugged core JavaScript issues, reducing runtime failures and improving overall UI performance.
- Used Git and GitHub for version control, collaborative code reviews, and detailed documentation of design changes.

VaultofCodes (Google for Education Partner)

Jul 2025 – Aug 2025

Full Stack Development Virtual Intern

Remote

- Contributed to end-to-end web application projects, managing clean script logic across front-end and back-end database systems.
- Implemented database connectivity using complex SQL queries and CRUD operations, guaranteeing transactional data integrity.
- Performed edge-case software verification and eliminated stability bottlenecks through methodical runtime debugging.

Projects

Child Missing Tracker | *HTML, CSS, JavaScript, MySQL*

2025

- Built a full-stack platform with unique ID registration and secure relational data retrieval to monitor public event safety footprints.
- Designed a data management dashboard and conducted failure mode analysis on edge cases to guarantee continuous data integrity.
- Authored complete technical documentation covering database schemas, workflows, and integration patterns for team knowledge transfer.

Organ-e: Emergency Donation Platform | *HTML, CSS, JavaScript, MySQL*

2025

- Developed a data-driven web environment with low-latency search algorithms for instant emergency records retrieval across regional medical facilities.
- Implemented strict client-side input validations and verification checks to protect data pipelines against injection and corruption risks.
- Built mobile-responsive application layers to maximize accessibility across multiple device endpoints.

AI Fruit Ripeness Detection | *Python, Machine Learning, Image Processing*

2025

- Built a classification pipeline using advanced pre-processing matrices to clean raw imagery and reduce decision variance under unpredictable field conditions.
- Developed and trained convolutional validation models achieving high accuracy thresholds with minimized classification errors across boundary edge cases.
- Maintained granular performance tracking metrics to ensure complete technical compliance and system viability prior to simulated production staging.

Certifications

ServiceNow & Networking: Micro-Certification: Welcome to ServiceNow — ServiceNow | CCNA: Introduction to Networks — Cisco | CCNA: Switching, Routing & Wireless Essentials — Cisco | CCNA: Enterprise Networking, Security & Automation — Cisco

AI & Cloud: AI Skills Passport — EY & Microsoft | Agentic AI Badge — IBM SkillsBuild | Prompt Design in Vertex AI — Google Cloud | Multimodal RAG Skill Badge — Google Cloud | Apply AI: Analyze Customer Reviews — Cisco NetAcad | Introduction to Modern AI — Cisco NetAcad

Programming & Databases: Basics of Python / OOP using Python — Infosys Springboard | Python 101 for Data Science — IBM CognitiveClass | Python — GeeksforGeeks | SQL & Relational Databases 101 — IBM CognitiveClass | SQL Basic Certificate — HackerRank

AI Foundations: AI Advanced & AI Foundation — HexArt | AI for Business Professionals & AI for Beginners — HP LIFE | Fundamentals of Sustainability and Technology — IBM SkillsBuild | Exploring Networking with Cisco Packet Tracer — Cisco NetAcad

Education

CMR Institute of Technology, Hyderabad

Bachelor of Technology in Computer Science & Engineering

Sep 2023 – May 2027

CGPA: 7.56

Sri Chaitanya Jr. Kalasala, Hyderabad

Intermediate / MPC

2023

Percentage: 96.9%

Narayana High School, Hyderabad

SSC (10th Grade)

2021

CGPA: 10.0
